### EXISTING LIGHT

In light-colored rooms with several windows, existing illumination can provide the light needed for taking pictures of such interiors. Meter readings should be made from various parts of the room, and the average value used to determine the correct exposure. It may be well to "bracket" by making one picture at one-half, the other at two times, the indicated meter reading. To get the room in focus, use the smallest lens opening on your camera.

## Office of the Mayor CITY OF TORRANCE CALIFORNIA

Dear Friends and Neighbors:

For the past four years I have had the honor of serving as your first elected Mayor. During that time, as well as for the preceding four years as Councilman and Mayor, I have worked toward orderly growth and development of this community. My constant objective has been to maintain and improve the efficiency of our municipal services while holding the line on taxes. Torrance has achieved national recognition as an ideal place to live and as a great industrial center.

I am seeking re-election as your Mayor, realizing that the future will bring new problems and challenges. I believe I am qualified for this important work by my years of experience and a record of construction legislation. Since 1930 I have been a lawyer in active practice and this legal training has been very helpful in making important decisions on matters before the City Council.

With your cooperation and goodwill, Torrance will go on making big strides forward. Our city could not have become great without the active participation of so many of its residents. Yours for continued good government, I am

Sincerely,

*Albert Isen*

City of Torrance
