

**TECHNICAL JARGON** is being used in this conversation between Dr. S. Goldberg of New Mexico State University's mathematics faculty and Owen Moss, a student from Torrance. Moss has been selected to participate in National Science Foundation undergraduate research program. He will begin in the summer program under the guidance of Dr. Goldberg.

## Owen Moss Assigned to Summer Program at State University

Owen Moss of Torrance, formerly of Seattle, Washington, is among 32 students selected to participate in New Mexico State University's National Science Foundation undergraduate research program.

Moss has been assigned to work on the summer program of 1962 under the guidance of Dr. S. Goldberg, assistant professor of mathematics at NMSU. He is currently being trained in basic mathematical functions dealing with research projects.

Students selected for National Science Foundation undergraduate research must be majoring in a field related to their research projects.

Purpose of the program is to train students in actual basic research. This opens the way for graduate study, which in turn will produce trained people able to do basic research in the future.

Sponsored by both the National Science Foundation and the university's research center, the students receive stipends of \$600 for a 10-week summer session and \$150 for the academic year program.

Moss is a freshman in physics at NMSU, where he has served on the publicity committee for Religion in Life Week and is faith chairman of Westminster Fellowship. He is also a member of Southwestern Mountaineers at NMSU.

He graduated from Highline High in Seattle. There he was president of Drama Shop and a member of the Chess Club.

He is the son of Mr. and Mrs. R. D. Moss, 2611 Grand Summit Rd., Torrance.

## Breakfast Plans Underway for Governor Brown

Plans are in the making for a breakfast honoring Governor Edmund G. "Pat" Brown to be held in the new Manhattan room of the Pen and Quill Hotel on Saturday, April 28, at 9 a.m. according to George H. Lowerre III, South Bay chairman of the Committee to re-elect Governor Brown.

Tickets are available now and may be obtained from the following committee members: Charles H. Wortham, Redondo Beach, FR 5-3300; J. B. "Bud" Mirassou, Redondo, FR 4-3456; George H. Lowerre III, FR 4-6156; Eric Rafter, Hermosa Beach, FR 9-8429; Sam Levy, Torrance, FA 8-2628; Rosemary DeCamp Shidler, FR 5-2253; Virginia Hilton, Palos Verdes, FR 5-2027; Ann Mitchell, Rolling Hills, FR 7-2311; Fred Baker, Lawndale, OS 9-2453; Barry Siegal, Westchester, OR 9-5085; Andrew Marinovich, San Pedro, TE 1-1274; Ray Choate, Wilmington, TE 5-7131; Trudy Owens, FR 5-5704.

Further details on the breakfast will be forthcoming shortly.

## Amateur Radio Enthusiasts to Learn Morse Code

The Marina Amateur Radio Club of Torrance announces the formation of a new beginning class in the International Morse Code.

Class is specifically designed to train students to pass their Federal Communications Commission license as amateur radio operators.

First class begins Monday, April 23 in room 108, North Torrance High School, 182nd St. and Yukon from 7 p.m. until 9:30 p.m. Interested persons are invited to attend and bring a friend. There is no charge.

## LeRoy W. Davis Presents Paper At Annual Meeting

LeRoy W. Davis, of the Harvey Engineering Laboratories, Torrance, is the author of an important technical paper which he will present at the 64th annual meeting of The American Ceramic Society. The meeting will be held from April 29 to May 3 at the Commodore, Biltmore, and Roosevelt hotels in New York City.

Davis will deliver his paper, entitled "Plasma-Arc Spraying" at the Society Symposium on Ceramic Materials and Spacecraft.

**ATTENDANCE**  
This 64th Annual Meeting will be attended by more than 3,000 ceramic scientists, plant operators, and engineers. The Society's annual meetings are the largest gatherings of ceramists in the world.

The American Ceramic Society, with more than 8,000 participants in 47 countries, is devoted to the advancement of ceramic research and development. The nearly 250 papers which will be presented at this year's annual meeting will aid the advancement of the ceramic field through the exchange of technical information.

The more than \$8 billion United States ceramic industry produces brick, tile, electrical insulators, rocket and missile components, glass, bathroom fixtures, spark plugs, and hundreds of other items made by the ceramic process.

## CAMERA DAY

Southland camera enthusiasts will have their first chance to photograph their favorite baseball players in beautiful new Chavez Ravine at Los Angeles Angels Camera Day, next Thursday. Shutter fans will be able to take as many shots as they desire on the playing field for thirty minutes prior to game time at 1:30 p.m.
