Local sports expects will have a new subject to bone up on when the Granite Curling Club of Torrance holds their first game, Nov. 19 at the Olympic Ice Arena, 6 to 8 p.m.

For those not in the know, curling is played on ice with stones weighing 42½ pounds each. Curling although originally played in Scotland some 300 years ago, is now a favorite sport in Canada. The Canadians are currently world champions.

This ice sport is played on lanes 126 feet long from the starting (hack) line to the scoring circle, called a tee line. Teams are comprised of four players and they are called a rink.

Object of the game is to "curl" a stone into the scoring circle. This is done with a curling broom. Made of straw and specifically designed for curling, the brooms come with a round "T" or flat shape to them.

A get acquainted dance will be held on Nov. 16 at the Higgins Brick and Tile Hall, 2100 W. Artesia Blvd., beginning at 8 p.m. Donation is \$1.

TRICKY TIME

Twilight is a beautiful time of day, says the Automobile Club of Southern California, but it can be a tricky period for the motorist. When you're driving into the setting sun, your speed should be reduced to compensate for the reduced visibility the low sun creates. Sun glasses help to overcome this hazard, but nothing takes the place of a reduced, safe speed.
