WHAT'S DOING?

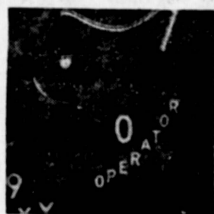

It was 86 years ago that phone numbers were born—with Dr. Moses Greeley Parker. During a measles epidemic in Lowell, Mass., Dr. Parker realized that if the town's four operators got sick phone service would virtually cease. He proposed using numbers in place of the 200 subscribers' names—which the regular operators had memorized—so that substitutes might quickly learn to operate the exchange. Keeping track of those 200 telephones, without numbers, was a problem then—but today with more than 90 million phones in the U.S.A. it would be impossible.

Next time you call long distance, why not jot down the things you want to talk about first? This way, you can say more in less time.

When President Johnson signed the 1965 Excise Tax Reduction Bill he stated its purpose: to help America grow by creating lower prices, more sales, more production, more jobs. As part of this bill, the 10% Federal Excise Tax on phone service will be removed in four stages: Beginning January 1966 it will be cut by 7%, then by 1%, each year until it is eliminated in 1969. The President said the Excise Tax reduction will make its maximum contribution to the country's economic health only if the full amount is passed along to consumers. The reduction in Excise Tax will be reflected in your telephone bill in January, which I'm sure comes as good news to you.

Here's a reminder from the United Crusade: "One gift works many wonders. Give and give generously. Your gift will be put to work where it will do the most good—and many needy people will be helped."

In emergencies, dial "0" for Operator. That's one way to get action fast... and remember to give the Operator the exact address and phone number you're calling from. **BETTER YET, it's a good idea to keep a list of emergency numbers near your telephone.** Dialing them yourself is the quickest way to get help in a hurry.
