About Cars and Things by **Ray Vane**

Hold your hats, the 1966 cars are coming. We are always vitally interested in what's new. Sometimes, it is pretty hard to find out. Seems the car makers don't talk as much as they used to about engineering and the car itself. Take Mustang for instance. Big sales success. Yet, the impression you get from their advertising is that the purchase of one will transform a jerk into a lothario. Like "a little dab will do you." Like "buy two and we'll give you a baseball bat to keep the girls away, instead of a shoe horn to help you get in."

Mustang isn't the only one advertising this way. Yet, an automobile is primarily a device to help you go from point A to point B in quick comfort. Obviously, over the years, great improvement has been made in engines, transmission and things other than chrome trim.

Chrysler, bless its corporate heart, has been a leader in much of this engineering advance. And, they advertise their mechanical excellence in a way you must accept. They **Put Their Money Where Their Mouth is** with the 5 year and 50,000 mile warranty. If the cars were not that much better, they couldn't do it.

Well our '66 cars are coming in now. They run dandy. They look good. Might be they could change your personality. You might need a baseball bat (but no shoe horn). But that is ridiculous. How could your lovely magnetic personality be improved upon?

Come see and drive our wonderful machines on Sept. 30 at 2909 Pacific Coast Highway, in Torrance.

P.S.—We still have some '65 models to sell.
