

Superintendent Explains Need for More Buildings

Where will the bond money go? This question was answered by Dr. J. H. Hull, superintendent of schools, at a meeting of West Torrance parents held at West High School.

Purpose of the meeting was to explain the school bond election scheduled for Feb. 8.

Bond funds, the superintendent stated, will be used for four purposes: to build additional elementary classrooms; to equalize facilities at the district's four high schools; to construct a vocational center so that non-college-bound students can have job entry skills; and, to purchase two additional elementary school sites and construct two more schools on those sites.

"WE NEED to pass additional bonds," Dr. Hull said, "because we have used up all existing building funds. We have run out of classrooms; we're growing at the rate of 1,500 pupils per year; and our only alternative is to go on double sessions."

"The bond issue is a routine occurrence which takes place every three or four years to keep up with growth," the superintendent pointed out. "It's the best way the state provides for school boards to finance buildings. Bonding is less expensive than pay-as-you-go financing because all the new people that come into a community contribute to the cost of buildings as they use them."

The superintendent stated that passage of the bonds would not increase the tax rate. "The tax rate for bonds will stay where it has been for the past several years," Dr. Hull said.

"COMMUNITY growth is a thing of permanence," the superintendent remarked. "Because Torrance is smog-free, close to beaches and jobs, and accessible to freeways, people are going to keep coming here. And they're going to bring their children with them."

"If we are to educate those youngsters plus the ones we've already got," he added, "we need classrooms and buildings in which to do so. Since we are presently bursting at the seams—with cafeterias, music rooms, and converted shop and home-making rooms—we are in no position to educate them in existing facilities. The only answer is more classrooms."

"Otherwise, we'd have no choice," he concluded. "We'd be forced to squeeze learning into doubled-up facilities on half-day sessions."
