The airman is a 1963 graduate of Gardena High School, attended Los Angeles City College, and completed basic training at Lackland AFB, Tex.

We spent \$220 million last year so you could keep on taking us for granted.

Flip a switch. The lights go on. You can take it for granted because Edison doesn't. Last year alone, Edison spent \$220 million on new plant construction to keep your low cost electric supply as abundant as ever.

A thousand people a day move to Southern California and everyone is using more and more electricity.

Since World War II, Edison has invested \$1.8 billion in new plants and equipment. That figure will almost double by 1970. New construction expenditures in the next five years will amount to some \$1.4 billion.

As a result, Edison customers will have all the low-cost electricity they need the moment they need it.

Or put another way: you can continue taking us for granted.
