HOW TO ROAST LAMB
Place roast, fat side up, on rack in shallow pan. Do not add water. Do not cover. Insert meat thermometer in center of roast, not touching bone. Roast in slow oven (325°F.) until thermometer reaches 175°-180°F. Remove roast to a hot platter and KEEP IT HOT. If the roast is allowed to "rest" for 15 minutes, the meat firms-up for easier carving. The thin, paper-like covering may be left on or removed before roasting, although roasts carve more easily if this is stripped off.
