

Question and Answers: The Role of Automation

By ALPHONZO BELL, Congressman, 28th District
On Jan. 23, 1965, the Associated Press reported that one in five American families at the start of 1965 owed \$600 in installment debts and \$11,000 on mortgages. This is a 10 per cent rise over the year before. Last summer the United States Department of Commerce, Bureau of the Census, made estimates for the main working ages (25 to 64). They believe our work force will grow to 90.1 million in 1970, 97 million in 1975, and 114.1 million in 1985.

To such a nation of debtors, forced to live with the spectre of change and displacement, the question is not whether our economy is expanding.

THE QUESTION is whether our economy is expanding enough. Automation accelerates production. But will automation create markets? Consumer goods will be made available with unsurpassed efficiency.

Troop 242 Sets Court Of Honor

Two Boy Scouts of Troop 242 of North Torrance will be honored at a "double" Eagle Court of Honor tomorrow night at Christ the King Lutheran Church.

David Miller, son of Mr. and Mrs. Kenneth W. Miller of 2809 W. 163rd St., and Robert E. Andres, son of Mr. and Mrs. Robert P. Andres of 2316 W. 164th St., will receive scouting's highest award. The presentation will be made by Warren Sexton, Jr., scoutmaster, of Troop 242.

Other awards, to be presented by Henry Boser, awards chairman, include: Second-class scout—Dennis Fandy, Robert Meyers, and Manuel Blanco.

First class scout—Guy Dickhudt and Jim Weaver. Star scout—Gary Johanson, Mike Bower, Ronald Rowan, Bernard Clayton and Guy Dickhudt.

Life scout—Tom Sexton and David Stiles.

MERIT BADGES—Ronald Rowan, cooking; Tim Sorenson, coin collecting; Scott Hanson, fishing; Bernard Clayton, reading and scholarship; Mike Bower, dog care and electricity; Gary Johanson, electricity; David Stiles, electricity; Greg Bangdman, personal fitness; Tom Sexton, dog care reading, and soil and water conservation; Roger Mashburn, bugling and electricity, and Gary Johanson, mile swim patch.

Melvin Iizuka, senior patrol leader, will serv as master of ceremonies. The court of honor is being planned by Bob Toft, special events chairman.

Steel Rail For Track Unloaded

Steel rail weighing 112 pounds to the yard and welded into 612 and 1,440 foot lengths is being unloaded in Torrance preparatory to being installed along 27.57 miles of Santa Fe Railway between Redondo Junction (Washington Blvd.), Los Angeles, and the Santa Fe station on Anaheim Blvd., Wilmington.

About half of the total distance will be laid with 1,440 foot rail lengths weighing 2 1/2 tons each, the remainder with rail welded into 612 foot lengths weighing a little less than 2 1/2 tons each.

Included in the project will be 142 switches and 97 street crossings.

Unloading of the rail will be completed the second week of February. Rail laying will begin the latter part of February and be completed in two months.

Santa Fe engineers in charge of the project said use of the welded rail will eliminate 90 per cent of the joints in a track section, resulting in a corresponding reduction in noise caused by wheels passing over joints.

But will people have money to buy them? It is not difficult to find pessimistic comment about this situation. For my own part I think that, though there will be many isolated problems, the essential adjustments will be made. Our economy will retain its strength.

Work hours will be reduced. Goods will cost less. An enlightened younger generation will recognize the need for discipline, and skill. EDUCATION will enter a golden age. But still there is a price that will have to be paid.

It will be paid by men and women of advanced middle age today and who today cannot accept the changes. This could be the lost generation. This will be the generation called to a special kind of war, which will be fought with many casualties. WHAT MAKES me saddest

about this judgment is the belief that much of the suffering will be unnecessary. It will be caused by human attitudes rather than by economic circumstances. It will come from men and women who will not accept change, who cling to the outmoded and the obsolete. What we can do to help them is regrettably limited.

The best is simply to call forth the resilience in the human spirit. People must be encouraged to stand up to the second half of the Twentieth century. Technology may cause pain. But it is truly a time of wonder. And our greatest gift as human beings is that we live today to see its wonders.
