

Garden Checklist

1. Continue to set out camellias. Prune before new growth starts. Cut back branches that touch the ground and branches that are broken or badly placed.
2. Don't let the weeds get ahead of you. Take advantage of the excellent selective weed killers available at nurseries. They'll rout the offending weeds without disturbing your lawn, ivy, shrubs bedding plants.
3. Set out clumps of delphiniums now and get as many as three separate flushes of bloom from them this year. Choose among the new varieties available in tall, medium and low, bushy plants, and work lime or bone meal into the planting holes.
4. This is a good time to plant citrus. Give it a warm, sunny spot in the garden. Tubbed dwarf citrus is a colorful and fragrant addition to the patio.
