Garden Checklist

1. This is one of the best months for putting in a new lawn or re-seeding an established one. Your nurseryman will be glad to advise you about yours, help you choose the right seed and provide you with the equipment to do an efficient job.
2. If you've been passing up azaleas because you can't give them shade, ask your nurseryman about the Sun Azaleas, or Southern Indicas, that actually prefer a good amount of sun.
3. Lily of the Nile (agapanthus) can be planted now. Give it sun except in warm inland sections where part shade is necessary. It likes loamy soil, but will grow in heavy soils under poor conditions and still produce its free-blooming clusters of blue or white flowers. If you want a small form of this showy summer bulb, ask for the variety "Peter Pan." Clusters of deep blue flowers only eight inches to 10 inches high. Terrific in rock gardens or borders.
4. For sunny color come summer, plant asters, zinnias, cosmos, petunias, ageratum, and salvia now.
