

Rhodesian Will Speak At YMCA

Speaking on the problems of his native Rhodesia will be Robert C. Huntley during an appearance at tomorrow's meeting of the South Bay Citizens for Constitutional Government. The meeting at the Torrance YMCA, 2900 W. Sepulveda Blvd., will begin at 7:45 p.m.

Huntley, who is chairman of the Rhodesian Society, a former Army officer of that nation as well as a recognized authority on African affairs, is heard over radio station KPOL in Los Angeles.

He will cover the legal and historical background of the country and its current problems, hopes and plans for the future. Rhodesia, boycotted by Great Britain and the United States when it assumed independence from the British Empire, has been a question of controversy both in this country and abroad.

A non-profit organization, South Bay Citizens for Constitutional Government is dedicated to the preservation of the concept of individual liberties and constitutionally limited government on all levels.

Cancer Society

Research Grants Top Half-Million Mark

More than half a million dollars in new research grants to California scientists is being sponsored by the California Division of the American Cancer Society, according to division president Lewis W. Guiss, M.D., of Los Angeles. The current awards, totaling \$531,645, will bring present research under society sponsorship to \$2,428,114.

Researchers at the University of Southern California accounted for approximately one-fourth of the dollar value of the new grants. Edwin H. Eylar, Ph.D., received \$39,167 for study of tumor cell membranes and Humberto Cravito, M.D., was awarded \$30,000 for research on acoustic neuromas. In addition, the school received a \$37,500 institutional grant to stimulate research in specialized fields. Also at USC, Raymond Les-

onsky, M.D., was awarded \$8,759.50 to study the cell development of both non-malignant tumors of the colon and rectum. Grace June Marshall, Ph.D., received a \$7,480 grant to study the role of the thymus in the development of the lymphatic system and in the production of antibodies. A grant of \$4,570 went to Russell P. Sherwin, M.D., for the study of living lung cancer cells by the means of time-lapse motion pictures.

FOUR OF THE grants announced went to scientists at UCLA. Those included \$25,394.00 to Richard Morton, M.D., for research on metabolism of sex and adrenal hormones; \$18,333 to Bernard H.

Feder, M.D., for research on pre-operative radio-therapy; \$13,740 to Arnold Kaplan, Ph.D., for a post-doctoral fellowship to study enzyme mechanisms; and \$12,226 to Edward Arquilla, M.D., Ph.D., for study of the mechanism that controls the destruction of aged red blood cells.

Also in Los Angeles, a \$2,898 grant was awarded to Paul Starr, M.D., at the White Memorial Medical Center for a five-year followup on children and adolescents who were given radio-active iodine

VISITS CAMP . . . Susan Foster, Miss Torrance of 1966, tries her luck at the ti-neckling poles during a visit to a Girl Scout Day Camp at Torrance Park. Holding the poles in an attempt to catch Miss Torrance off balance are Barbara Perrone, 12, of Troop 886, and Debra Pfaff, 12, of Troop 1591. Watching the action are Candy Weight, 9, of Troop 8, and Laura Listerud, 9, of Troop 6.

Harbor College Boasts New Record Enrollment

The largest summer enrollment in Harbor College's history was announced by Kenneth R. Williams, dean of summer session. The anticipated 15 per cent increase over last summer's enrollment was more than realized.

The final enrollment period was scheduled for Monday, but the possibility for late enrollment for those who missed the deadline is not an obscure one, as the summer session begins Friday and ends Aug. 12.

Although many classes are closed, there were some classes still open for enrollment. Williams called attention to architecture, engineering, drawing, drafting, business computations, accounting, office machines, health and speech as being among the courses still open to enrollment. Additional sections have been added to popular classes, Williams said.

No admission tests or transcripts are required for the summer session. Any high school graduate or person over 18 years of age may attend. A schedule listing the available courses may be obtained by phoning or visiting the college.

Main Street

Traffic signals at Main and 220th streets will be relocated behind a new curb constructed under county permit at the northwest corner of the intersection, Supervisor Kenneth Hahn announced today.

Hahn said the project will increase traffic and pedestrian safety.

Science Shrinks Piles New Way Without Surgery Stops Itch—Relieves Pain

New York, N. Y. (Special) — For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids, stop itching, and relieve pain — without surgery.

In one hemorrhoid case after another, "very striking improvement" was reported and verified by a doctor's observations. Pain was relieved promptly. And, while gently relieving pain, actual reduction or retraction (shrinking) took place.

And most amazing of all — this improvement was maintained in cases where a doctor's observations were continued over a period of many months!

In fact, results were so thorough that sufferers were able to make such astonishing statements as "Piles have ceased to be a problem!" And among these sufferers were a very wide variety of hemorrhoid conditions, some of 10 to 20 years' standing.

All this, without the use of narcotics, anesthetics or astringents of any kind. The secret is a new healing substance (Bio-Dyne®) — the discovery of a world-famous research institution. Already, Bio-Dyne is in wide use for healing injured tissue on all parts of the body.

This new healing substance is offered in suppository or ointment form called Preparation H®. Ask for individually sealed convenient Preparation H Suppositories or Preparation H Ointment with special applicator. Preparation H is sold at all drug counters.
