

# Completion Near For New College

Specially designed facilities for California State College at Dominguez Hills, located at 809 E. Victoria St., Gardena, are nearing completion a full month ahead of schedule, according to an announcement made last week by college officials.

## Archery Classes To Meet

Despite distinct sounds of whistling arrows, Torrance residents in the vicinity of Entradero Park need not worry about a possible Indian uprising, the Torrance Recreation Department reports.

Arrows, targets, youngsters, and housewives seen in the area are all part of a planned archery program sponsored by the Recreation Department. Classes meet regularly at Entradero Park between 9 a.m. and 2 p.m. Mondays through Thursdays.

Nearly 50 persons, including 18 housewives, completed their sixth lesson this week, making way for new classes.

Youngsters 10 to 18 years old and adults may participate in the three-week sessions by enrolling at the Joslyn Recreation Center, 3335 Torrance Blvd. A fee of \$1 covers use of equipment and entitles entrants to 9 hours of instruction.

Further information on the archery program may be obtained by calling the city's Joslyn Recreation Center, or by visiting Entradero Park during hours of instruction. The park is located at 5500 Towers St.

## Siren Test Set Friday

The combined civil defense warning-siren system of Los Angeles city and county will be sounded at 10 a.m. Friday in the usual month-end test, Sheriff Peter J. Pitchess announced today.

The usual sound pattern will be heard, Pitchess said. It will begin with a steady wail for two minutes, followed by 30 seconds of silence, and end with an undulating sound lasting one minute.

County residents donated 75,000 hours of their time last year to the central and branch offices of the Los Angeles County Heart Association.

## WHAT'S DOING?

Most children have a natural inclination toward good telephone usage. They answer politely, take messages correctly, call you to the phone quickly—and do not use the telephone as a toy. This pays off for parents, too... in compliments from friends who have talked with your children, in the valuable training that the children receive, and in getting your own incoming messages correct.

50 years ago, the San Francisco Press Club was entertained by Enrico Caruso. However, the operatic tenor was singing in Atlanta, Georgia! This was 1916—eight years before the first coast-to-coast broadcasting hookup. Caruso used the lone transcontinental telephone line for his 2,000 mile "O Sole Mio!"

## ADVANCING

On May 27, 1966 we started an advertising campaign on radio, TV, Newspapers, posters and by word of mouth. This campaign was to call attention to the new information number "411" and the new repair number "611."

We are standardizing our system and preparing for future advances in telephone communications. In the past you have been able to reach your information operator by dialing "113" or "411" and the repair clerk by dialing "114" or "611." However, by dialing either "113" or "114" you will be intercepted and asked to dial "411" or "611."

This change is essential and will be more profitable to you for the eventual ease and simplicity of telephone usage.

Thanks for your help and cooperation in our endeavor to better serve you.

How did an inexperienced telephone operator answer a caller's request to notify him when his 3 minutes were up? The operator, now a cool-headed veteran, says, "I was still new at my work, so at the end of the three minutes I came on the line and said, 'Sir, your time has come.'" The operator can smile about her "gool" now. But she was disturbed at the time—and I'll bet her customer was too!
