 OPEN EVENINGS & SUNDAY

**WE STARTED WITH A SIMPLE PLAN.**  
 It all began with the notion that a wagon should hold a lot, and no notion about how it should look. So when we sat down to design the VW Station Wagon we started by drawing a big box with 170 cubic feet of space. (Roughly two times the room of an ordinary station wagon.) This gave us room to seat 8 people comfortably and 13 pieces of luggage. (13 bags more than you could ever fit into most wagons that hold 8 people.) Once we got the people in we couldn't just let them sit there in a dark box. So we cut 21 windows to let the light in, a big hole in the back to put luggage in, and 4 doors to let the people out. To make the thing go, we put the air-cooled Volkswagen engine in back. And what we ended up with is what you see in the picture. A wagon that holds a lot, parks easily, and doesn't drink much gas. What could be simpler than that?
