PORK CHOPS

A black and white photograph of a fossilized skull fragment. The fragment is roughly triangular in shape with a jagged, irregular edge. It shows the eye socket (orbit) on the left side, which is dark and deep. To the right of the orbit is the nasal cavity, which appears as a series of dark, vertical openings. The bone surface is textured and uneven, with some lighter areas and some darker, more shadowed regions. The overall appearance is that of an ancient, weathered bone specimen.
