

# Lower Underground Water Levels Predicted in Area Easement Approved To Utility

Lack of rain during the 1967-68 water year will lead to historic lows in several county groundwater basins this fall, Supervisor Burton Chace reported today. Statistics compiled by County Flood Control District Chief Engineer Walter Wood indicate that precipitation has been about 81 per cent of the 90-year normal. Chace said net change in groundwater storage in the San Gabriel Basin increased only about 14,000 acre-feet between November, 1967, and May, 1968, compared to 200,000 acre-feet in the same period last year. Runoff from the San Gabriel Mountains was 243 per cent of average during the 1966-67 year and is estimated to be 71 per cent of average during 1967-68. Chace added more than 40 per cent of the county's daily water needs are supplied by the underground basins. An easement over a parcel of land in the Carson area has been granted by the County Flood Control District, Supervisor Kenneth Hahn said today. The easement is being granted to the Southern California Gas Co. for a pipe line across Dominguez Channel northwest of the intersection of Wilmington Avenue and 223rd Street. Hahn said the easement has no market value and no funds are involved in the arrangement. The Post Office Department operates a fleet of 56,607 trucks in addition to many other types of vehicles.

## PPG Directors Set Dividend

Directors of PPG Industries have declared a quarterly dividend of 70 cents per share, payable Sept. 20 to shareholders of record Aug. 6. Directors also have called a special stockholders meeting for Nov. 13 to consider a 2-for-1 stock split.
