Sample Ballots Mailed To Registered Voters

By BURTON CHACE

No subject is more on the minds of citizens these days than the Nov. 5 general elec-

tion.
And it's about this time each election year that vot-ers realize the full impor-tance of casting a ballot which best expresses their views, both on the candid-

ates and the propositions.
So that voters can have plenty of time to familiarize themselves with the ballot and the arguments on the propositions, sample ballots are mailed in advance by the County Registrar - Recorder to all registered voters.

SAMPLE ballots are being mailed to 578,819 registered voters in the Fourth District, which I represent. This com-prises approximately one-fifth of the county's 3.1 mil-

lion registered voters.

In the June Primary, there was some difficulty with the printing and mailing of the sample ballots. Every conceivable step has been taken to assure that weters will receive them in voters will receive them in plenty of time for thorough study in this election.

Printing and mailing sam-ple ballots is a complex job, since there are 232 different ballots being used throughtout the county. In addition to national, state, and county issues, the ballots must reflect district questions, municipal judgeships, and other local items.

JUST TO show you what a mammoth job the mailing is, consider the fact that six inserting machines are oper-ating 18 hours daily, filling 200,000 envelopes for mail-sample ballot by Thursday, ing. You should have your

It's important that you are familiar with all the issues this election, and a sample ballot performs this service.
