From The Committee To Prevent Alan Cranston From Representing California in The United States Senate.

> Committee To Prevent Alan Cranston From Repre senting California in the United States Senate.

### Dear Fellow Californians:

Recent polls indicate the possibility of Alan Cranston becoming the winner in the present contest for the United States Senate.

If this were to occur, we firmly believe that it would be a tragedy both for the State and the Nation.

America today is facing the greatest crisis in her history.

This crisis exists in our courts, which have usurped the power of the congress, issuing edicts that are clearly the prerogative of the legislature. They have overruled the traditional rules of law, and as a result have freed criminals, and encouraged pornographers, dope peddlers and anarchists.

It exists in our universities and our colleges, where the facilities of our finest educational institutions are being diverted to the teaching of revolution and anarchy. Recently, Ernest Mandel, the youth leader who is credited with starting the French revolt, which all but overthrew the government of France (who has since been banned from France), spoke on the campus of Rutgers University. He, together with a substantial group of the nation's educators, outlined a plan for the bringing about of a comparable revolution in America with the ultimate objective being the overthrow of our present government. Groups who openly advocate anarchy and the revolutionary overthrow of our government dictate to, and inimidate the administrators of our colleges by the most unbelievable kind of violence and coercion.

It exists now in our high schools where the chaos in our colleges is spilling over. Recent revelations show that a substantial number of our high school students are being subjected to the use of marijuana and other types of drugs.

It exists in virtually every phase of our society where the baser elements are taking over, encouraged by the permissiveness that has emanated from the federal government during the past decade. The federal government and the federal courts have not only failed to check this program of permissiveness but have actually interfered in the areas of local law enforcement.

This permissiveness has been made possible, in our opinion, by the influence of the ultra liberal left in our political society. They have been successful in defeating all efforts to contain this influence. We do not question the sincerity of many of these persons who call themselves liberals but they have permitted themselves to be influenced, and used by persons who are clearly aligned with our enemies. Their good intentions do not mitigate the damage that their bad judgement has created for our society. We, therefore, believe they have forfeited their right to any further confidence by the American people, and the people of California.

Mr. Cranston since entering politics in California has aligned himself with the ultra left in our state political structure. In 1953 he participated in the formation of the California Democratic Council and was elected its first president. The founders of CDC followed the demise of the Independent Progressive Party, which openly supported communist candidates for office in 1952. Thousands of the persons who were registered with the Independent Progressive Party became members of the CDC upon its formation.

Since its formation it has advocated an extreme leftist position on most issues. It has made no secret of the fact that its basic purpose was to bring pressure within the Democratic Party in California to get its position adopted by the Democratic Party and to get persons into office who would support and further its position. The following is a list of some of the programs and positions it has advocated over the years:

1. Admission of Red China into the United Nations

2. Amnesty for draft evaders

### 3. Release from prison of Communist conspirator Morton Sobel

- 4. Setting up of police review boards
- 5. Abolition of House Committee on Un-American Activities
- 6. Curtailment of United States sovereignty through creation of a World Government
- 7. Abolition of all Federal and State loyalty oaths
- 8. Stopping the bombing of North Vietnam and negotiate directly with the Viet Cong
- 9. Opposition to the Subversive Activities Control Act

10. Amnesty for all Californians convicted for civil rights demonstration offenses

Alan Cranston has been a leader of the California Democratic Council and an advocate of its policies since it was founded. He has never concealed his affinity for the ultra left position. He has approved and supported the program of permissiveness which is at the root of our problems in maintaining a decent and free society. Therefore, if the people of this State send him to the Senate they should know exactly what he will stand for – permissiveness in our domestic society, compromise and appeasement of our foreign enemies and a complete disregard of the subversives and the anarchists that are systematically and certainly destroying our free society. His present position on Vietnam is a case in point; namely, unconditional cessation of the bombing, thus, accommodating Hanoi's demands.

We believe that if the voters of California examine the facts they will overwhelmingly reject his candidacy.

We do not question his loyalty. We are not asking you to judge his motives. We do ask you to look at his record and ask yourself: DO YOU WANT THIS KIND OF A PROGRAM CONTINUED IN AMERICA?
